E2110 with Type ‘E’ Sticking and Type ‘S’ Panels
We offer a collection of door panels and sticking profiles that will enable you to design the door of your choice. See the panel and molding options on the following pages that together with the sticking profiles will help you build the door of your choice. You can combine any sticking profile with any panel option, these can be used with any of the panel configurations shown in this brochure.

POCKET & SLIDING DOORS

POCKET DOORS
Pocket doors are designed with 1 stile 1" larger than the other. The wider stile sits in the pocket so the visible part of the stile is equal to the stile on the other side. The top rail has an extra wood edge to accommodate hangers and fittings. The top rail can also be made 1" larger if required.

BARN DOORS
Barn doors can be made in any size or in any panel configuration.

We can manufacture flush doors up to 60" wide by 96" tall. Paneled and Glass doors in larger sizes if needed, call for more details.

All Fire Rated Doors are constructed with intumescent cores which give them their fire rating. The look and design of the door is not compromised by the fire rating.

Fire Rated Doors are normally utilized in commercial applications and in single family residential buildings from the garage to the house.

Almost any design is available as a Fire Rated Door with ratings up to 90 minutes. (20, 45, 60 & 90)

Fire Rated Door Jambs are available in virtually any width to match the wall thickness. Positive or negative pressure veneered in any wood species to match doors up to 90 minute ratings.
HIGH QUALITY MDF DOORS
20, 45, 60 and 90 minute Fire Rated Doors

QUALITY DESIGN

• All fire doors are 1 3/4" thick
• All fire doors are positive pressure rated (CAT. A)
• Stile and rail construction to match non rated door designs
• Can be made with raised or flat panels

We normally hang all our doors on solid Poplar jambs. This is a quality hardwood jamb that works well with the quality MDF door that is going to be hung on it. We can also supply cased openings, but do not supply casing. If price is a big consideration, we can also offer FJ Pine jambs. We do not offer FJ Pine jambs on jobs of less than 50 doors.

Our pre hung doors are normally supplied with heavy duty ball bearing hinges which are available in all the standard finishes.

**Standard Jamb Thickness**

3/4” & 1 1/16” - we also offer custom thickness jambs.

QUALITY COMES FIRST
OTHER MANUFACTURERS OPTIONS ARE OUR STANDARD

The Following are supplied standard on Ecco Doors

• Proper wood edge in both stiles, avoids cracking on the edge of the door when screws are inserted into hinges.
• Premium quality, double refined MDF.
• Premium 2 coat priming.

We can supply the following on request

• Doors sized for pre fit.
• Doors bevelled 3 degrees on one or both sides.
• Doors supplied with pre-primed jambs fully pre-hung with good quality hinges, ready to install.
• Doors machined for locks, hinges, flush bolts, ball catches, etc.
HIGHRISE & HOSPITALITY
Great for use in hotels, office buildings and luxury living projects. EccoDoors can be custom designed and manufactured to your exact requirements. We will gladly work with you to create the custom door of your choice.

We are fully versed with the special requirements for large projects and are able to offer the following.

• A full set of shop drawings for your approval.

• The supply of a full set of sample doors for the project.

• Machining of all doors for hinges, locks, ball catches, flush bolts, pivot closers, etc.

• Palletizing of doors by floor and tagging of doors by unit number.

• Pre-scheduled on time delivery.

• Shipping to customers designated destination.

• Quick & Responsive reaction to any changes that may be required.
LEED CREDITS

All Ecco Doors are manufactured with Carb compliant, Trupan MDF that contains 100% pre-consumer recycled content.

We utilize low VOC water based primers and glue.

With our standard doors you would qualify for the following LEED credits,

- Recycled content 10%
- Recycled content 20%
- Certified wood

SOME INTERESTING FACTS

- One third of the U.S. (749 million acres) is forestland.
- Tree growth exceeds harvests in all areas of the U.S.
- The U.S. forest resource has grown by 39% since 1953.
- 4.6 million trees are planted every day in the U.S.
LEED / GREEN

High Recycled Content
All Ecco Doors are manufactured from Trupan MDF which contains 100% pre and/or post consumer (recycled and or recovered fiber)

Low VOC’s
All primers and adhesives are water based and have LOW VOC’s

No Added Formaldehyde
Ecco Doors meet the national standards for formaldehyde content with less than 0.11 parts per million. Ecco Doors can also be manufactured with ULEF (Ultra Low Emission Formaldehyde) – MDF – this is an optional extra and must be requested when a job is quoted.
